

# 3M Flexible 0.15mm Aluminium Asset Tag Anodized + Laser Engraving

Total: €4.47

Unit: the label

- A 100% metal plate
- Extremely difficult to remove
- High level of security
- Economical (Exclusive Laser process)
- Identification plate

Do you want an aluminium asset tag that is extremely difficult to remove? Opt for our 3M flexible aluminum 0.15 asset tag. You will not find a better quality-price ratio.

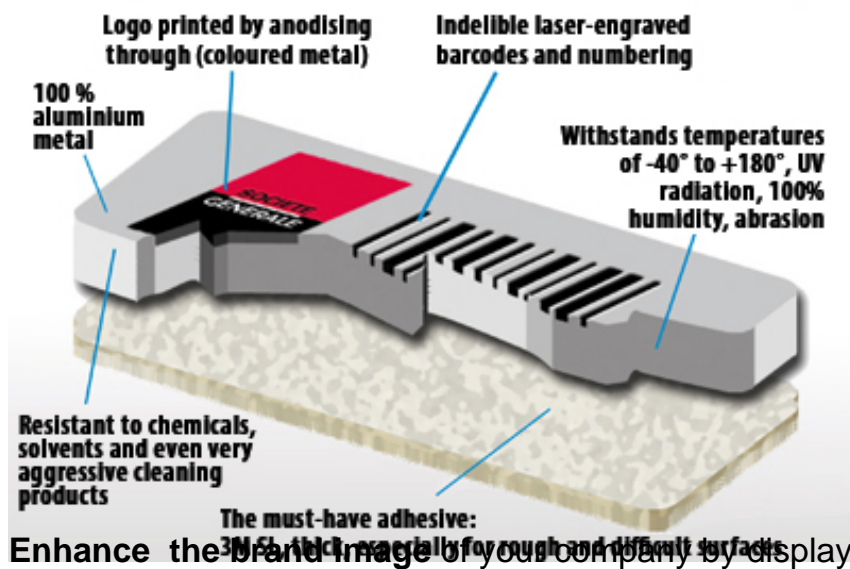

The 0.15 mm thickness of this aluminium asset tag allows it to fit in with the forms of rounded surfaces.

Almost impossible to manually remove without a tool and easy to stick: **the 3M 300LSE high performance adhesive of this aluminum asset tag, intended for special rough surfaces, makes it the best among industrial adhesives.**

**The high quality label printing** of this metal label is either by anodization (the metal is thoroughly-colored) or by screen printing. The variable information (numbers and barcodes) is inserted through **deep laser engraving, which makes it indelible and unalterable.** This design makes the barcode asset tag **exceptionally resistant to abrasion, solvents, high pressure cleaning and outdoor exposure and UV.**

## An Aluminium Asset Tag that is indispensable for your brand image

Enhance the brand image of your company by displaying your [logo](#) in color on the barcode asset tag. The identification label certifies the ownership of the labeled equipment. You will thus have a **very high quality aluminum asset tag, owing to its fine print quality** and its compliance with the colors of your graphic charter. Your logo will also withstand the harshest conditions since **the metal will be thoroughly colored** by electrochemical anodization. You have a choice of 10 standard colors, and all Pantone colors are possible in screen printing for each identification plate.

## A customizable Aluminum Asset Tag

**Customized your asset tag** by laser engraving all your variable information (texts, [numbering and/or barcodes](#)). The **numbering and barcodes are permanently and deeply laser engraved** on the **aluminum asset tag**, which makes them **indelible**, and available at the lowest production cost in the market. Compare!

It is also possible to manually create embossed intaglio on each metal label, thanks to our [Cold heading numbering machine](#).

## STANDARD ANODISING COLOURS

Take advantage of our **highly discounted bulk rates** on these metal plates by making an [accurate estimate of your quantities](#).

Plate costs are charged only for the first production of the professional plate. Reprinting of the [sequential numbering](#) is an option.

*(The announced delivery time is effective only after press proof approval)*

## Caractéristiques du produit :

Unit	the label
Conditioning	per pack of 50
Guarantee	1 year
Attachment	Sticker
security	Any
Adhesive	Very powerful
Printing	Engraving
Printing resistance	Optimum / Protected
General resistance	Oils / Solvents
Material	Metal
