Total: €223.50

Unit: the box

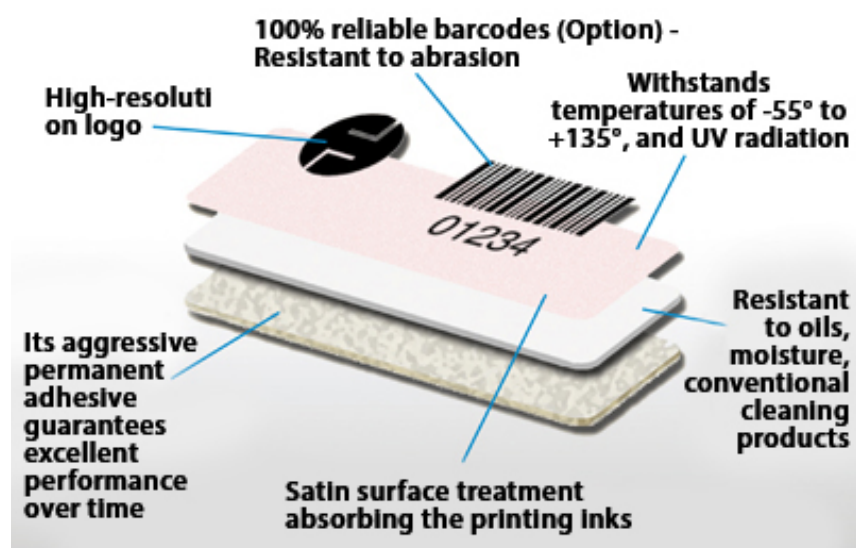

- Ultra-resistant
- Laser print
- Strong adhesive
- Exceptional holding strength
- 30 labels per sheet
- 34 sheets per box

The 3m laser label will be indispensable if you do not know your numbering in advance and if you wish to single out the identified material.

Here is a range of high tech blank labels for laser printers which offers unmatched performance that is better than standard polyester labels in the market: high-performance top layer bonding of the laser inks (print is resistant to scratches, abrasions, chemical products...).

These **blank laser printable labels** are equipped with a **thick, high performance acrylic adhesive** that ensures excellent durable holding strength.

**A highly resistant polyester laser label**

This color particularly resistant to extreme temperatures (-55° to +155°, freezing, autoclave/sterilization), to humidity, oils, solvents, cleaning products and to the harshest environments.

**The most:** Ideal for highlighting your signals and warnings, this polyester laser label in bright colors (green, blue, red or yellow) are distinctly visible.

### Customise your own labels with label editing software

Thanks to the [Nicelabel Designer](#) editing software and the [templates](#) of our A4 self-adhesive labels, you can now easily personalise your labels in sheets. This editing software is **easy to use and intuitive**. It will allow you to save time and also to exchange templates of your own personalised labels.

To use the templates, you just need to have the Nicelabel Designer 2019 version (if you already have a previous version, you need to update to use the templates), then download the templates. Then open the label template you want and customize your labels as you wish with **texts, barcodes, images...** When your self-adhesive label template is finished, click on Print and choose your printer and print! It's that easy.

You can find the templates either in the [SBE download area](#) or in the **product sheet**, in the sliding scale prices tab (under the price tables).

*Note: make sure that the print area of your printer matches the area of your labels (in rare cases, the print area of the printer may be smaller and your labels will be cut off). Also, make sure that your printer's printing on conventional paper is straight.*
