## How is the Zeus security seal used?

Like padlocks, seals also have different ways of closing. Some are sealed from **the front**, **others from the back**, or **with a lead**.

Here, the Zeus security seal is one of those which are **sealed from the back**. You just have to hold the head of the seal with one hand and the stem with the other.

A simple energetic pull, once inserted in the locking mechanism, will be enough to engage the tightening of the notched rod.

To break the seal, you have three choices:

- **Manually** : bring elbow grease since it is a security seal and requires a certain amount of pulling force to break manually;
- **Easy to open** : just pull the tab and tear it off;
- **With scissors** : clean cut

It is recommended to personalize the seal with a serial number, in order to further guarantee the security and identification of your property. This way, if a third party breaks the seal or replaces it, it will be easy for you to determine the theft or the break-in.

## The Zeus ultra-resistant plastic security seal: a customizable seal ?

At SBE Direct, we are committed to customer satisfaction. We believe that customer satisfaction is achieved through **products that reflect your company's image**. In this sense, we wanted to make sure that the personalization was as complete as possible.

Also, we offer you the choice between two formats of Zeus security seals in recyclable plastic :

- **Zeus Court** :

- **Zeus Long :**

Personalization by **laser printing** guarantees **exceptional precision**(It should be noted that this type of printing is done exclusively in black).We have chosen this printing process in order to guarantee its **durability, a high quality and a long lasting life.**

It is imperative that your text fits on the personalisation space on the head of the seal. Here, in our case, the printing space is 24x33mm.

It will be possible for you to inlay what you wish to see appear on the head of the seal (green insert on the diagrams), whether it is :

- **A logo,**
- **A serial number,**
- **A barcode,**
- **A QR Code.**

Concerning the general visual aspect of your plastic warranty seal, we offer more than 12 different colors :

## What is a security seal ?

There are many different types of seals for different uses. These uses have a direct impact on the shape, the material or the stem of the seal. In this sense, a security seal will be fundamentally different from a warranty seal.

The difference between these two types of seals lies in the use you wish to make of them. Indeed, securing a product or an asset is different from ensuring its authenticity. So, before buying a seal, ask yourself the following question: **What use will I make of it ?**

In this case, the first use of a security seal is to guarantee **the security of the products or goods** and to prevent any attempt of fraud, break-in or theft.

Security seals have many advantages such as **security, versatility and solidity**. They are designed to discourage malicious people, they also allow to secure the content of the moved item, since they are very difficult to destroy and/or cut. These seals are considered as indicative seals (e.g. plastic) which can be broken manually, with force.

In order to get more precision about the different types of seals, we have written an article about : [Which security seal for which use ?](#)

### Typical areas of use for the Zeus heavy-duty plastic security seal:

The Zeus plastic seal is one of the strongest seals, the quantity of material used makes it extremely robust. In fact, it is hardly possible to break it manually, so you will need a cutter. Its sturdiness makes its use in various environments, very interesting and complete.

**Transport** : When it comes to maritime and road transport, the Zeus plastic seal is the best in its category. It is ideal to secure containers (present on ships or trucks during transport), tarpaulin trucks and tankers. In addition, in the rail freight industry, this seal is used to protect some wagons with limited access and containing goods. In air transport, the Zeus security seal made of ultra-resistant plastic is used to secure carts containing foodstuffs and duty-free products.

**Mail delivery** : Does it bother you that your mail or packages are opened by a third party? So do we! That's why we have developed an ultra-strong, flat 6 mm notched seal to prevent this from happening to you. The Zeus security seal is used to close plastic containers with lids as well as bags containing mail and parcels.

**The medical field** : This field requires the use of intuitive, robust and durable products. The Zeus security seal made of ultra-resistant plastic is the seal that suits this type of application. Impossible to break manually, it is ideal for securing cabinets containing

dangerous drugs or seizures of narcotics. This guarantee seal is regularly used for the control of food and care carts during the whole transport, from the production to the final consumption place.

**Chemical and food industry** : This industry is one of those requiring robust seals, but with easy opening, the Zeus plastic seal meets all the criteria. Equipped with a hole for a label holder in the standard model, the Zeus is ideal for securing goods, logistics or external transport.

**Banking** : The banking sector is one of the sectors where sensitive data and important documents are stored and processed. Therefore, their backup is of paramount importance and their security is mandatory. It is thus necessary a means of adapted safety. The Zeus security seal in ultra-resistant plastic is the ideal tool.

**The field of fashion and E-commerce** : Opting for the Zeus security seal in ultra-resistant plastic, it is to opt for the insurance of ordered and received products not opened and not consumed. The Zeus plastic seal is the guarantee of reliable deliveries of goods and products.

## **An environmentally friendly plastic seal !**

At SBE Direct, we are committed to reducing waste and operating in an environmentally responsible manner, and we want to extend this to our products, so that we can offer you more **environmentally friendly products**.

Our seals are **ISO 14001:2015** certified, which means that they perfectly meet the requirements of our environmental management system. In addition, this international standard is an aid to the management of your environmental responsibility, it strongly contributes to sustainable development and is a pillar of the **CSR policy of companies**.

The Zeus plastic security seal perfectly meets the specifications! Indeed, this plastic seal is **completely recyclable**.
