

The Complete Kit For Cold Stamping

Total: €901.00

Unit: the safe

- Customize your own aluminium plates
- Create your own customized labels

This complete kit for cold stamping contains all the equipment required for labeling your property and customizing all types of surfaces (metal, plastic, wooden, etc.) through a permanent indentation.

Equipped with an efficient and powerful engraving mechanism : characters in drawn steel on a treated steel die enable precise and permanent cold embossing on steel surfaces (except on treated steel).

The perfect calibration of the corrected blocks and the mechanically executed cold embossing ensure the **perfect alignment** of the type holder for **extremely precise press marking or stamp marking**. This type holder may contain a line of either 8 characters (height: 1 to 4mm) or 6 characters (height: 5mm onwards).

This complete kit for cold stamping allows you to customized, mark and number your plates and property as and when required.

It is an **economical investment** as it does not inValveany additional costs and the high strength of the components used ensures durability.

- 100 characters (alphabets and numbers with duplicates) and 20 blocks
- 1 type holder for a perfectly aligned line of text
- 1 anvil in treated steel, fitted with a shaft for hammering (or a rotating shaft for optional press mounting)
- 1 six-point male Allen key

- 1 forceps for characters up to 4mm in height

The characters made of extra hard drawn, ground carbon steel treated at 58/60 HRC and nickel, are available in several heights (1 to 10mm), to perfectly meet your needs. In order to ensure complete satisfaction, each kit undergoes a thorough final inspection.
