

Security Label - Printed Partial Transfer.

Total: €490.00

Unit: per roll of 500

- Secure all your transport of funds
- Leaves an evident tampering message in case of removal
- Ideal as an indicator of guarantee.

After application of the adhesive

After removal of the adhesive This adhesive roll has an antitheft indicator in the form of a security label which helps to secure all your plastic packages and metallic boxes. It is

particularly used in banks, casinos and shops.

Offer more security to the transfer of your assets and cash with this reliable and adhesive seal.

Using a **high performance acrylic adhesive system with partial transfer**, this high security seal leaves a small amount of residue on the concerned surface. In case of tampering of the label, **a permanent message will appear on the label surface and the base simultaneously.**

Very effective on most plastic surfaces, these labels are ideal for casinos, banks and courier companies, especially for transporting funds.

An effective deterrent against tampering of packages and confidential documents.

This adhesive seal roll mainly helps to:

- Seal your paper bags for fund transfers
- Attach security labels as guarantee
- Protect and seal your containers of expensive raw materials as well as your storage cabinets
- Ensure seals for evidence in criminal investigation

- Prepare for visits by important personalities (for example: seals for bottles and meal trays in lodges for example)
- Ensure the sealing of bags and sachets with limited access
- Seal your IT systems in order to avoid data theft
- Seal paper bags carrying CDs and DVDs to ensure that the content is not visible
- Secure products in the design and development phase and ensure their confidentiality
- Protect your dangerous, harmful, or fragile components.
- Prevent the exchange of merchandise being transported
- Design the packaging of products

[Customize your security seal](#)

From 500 labels (i.e. 1 roll), it is possible to save as well as customize your seal.

Customization of the surface of the security adhesive seal

You can customize your labels with your brand image, by modifying the following items:

- Fixed displays: logo, text, slogans, etc.
- Variable: barcodes, numbering, QR-codes, etc.
- Color: Yellow, gray, blue, green, violet, etc.
- Format: 9 standard formats in mm

This customization provides a significantly higher level of security and **enhances the brand image of your company**. You can thus impart a truly personal touch to your seals. Printed in black, the printing is done using thermal transfer, a technique ensuring **a perfect finish to the product**.

The processing fees are charged only for the first production. (The delivery time mentioned is effective after the press proof approval)

Label size

From 50 rolls, the label format can be defined according to your choice, just like the packaging of rolls.

Production costs of €250 excluding tax. Contact us for a quote

In case of routing a standard parcel, the label should remain intact till delivery. If any tampering has taken place on the package, an "OPENED VOID" message will appear on the tampered label and on the surface, thus immediately indicating that the parcel was opened.

For optimal use, the safety adhesive must be applied with sufficient pressure on a flat, dry surface, free of dust and grease. It is also advisable to avoid touching the adhesive surface in order to preserve its effectiveness.

Caractéristiques du produit :

Unit	per roll of 500
