

# 3M Heavy Duty Adhesive Blank super resistant Machine Plate In TTh Rolls

Total: €298.00

Unit: the roll of 1000

- Good hold on all the surfaces
- Resistance in harsh environments
- Label roll

Just like the [polyester asset plate in A4 Laser sheet](#), this Machine Plate is made of metallic polyester, and a 3M Heavy Duty adhesive that imparts an excellent hold on many surfaces (especially rough surfaces). The manual removal of the Machine Plate is thus difficult.

This **polyester Aluminium Machine Nameplate** will ensure remarkable hold on any type of rough outdoor surfaces, as well as harsh environments. This polyester machine plate, also called an **asset plate** is resistant to **scratches, abrasion, numerous chemical products, extreme temperatures (-55° to +155°), freezing, humidity, oils, common solvents and cleaning products.**

## Customized your Polyester Machine Plate

You can **customized your machine plate** one by one on any thermal transfer printer, **by using resin roll**, including [SATO and CAB](#). You can thus **have machine plates with a sturdy metallic look, that doesn't change much with time, for a very economical cost.**

*To know other sizes of the asset plate such as color pre-printing and transparent protections, contact us.*

*Like these ownership plates, we offer yet another [a tamperproof plate](#) that ensures secure*

*labeling of your property.*

Reference	Label Format	Diameter of the mandrel	Roller Diameter	Printer Compatibility
MIS-PFP-74	75x40 mm	40 mm	109 mm	SATO et CAB
MIS-PFP-105	100x50 mm	40 mm	145 mm	CAB
MIS-PFP-115	100x150 mm	40 mm	145 mm	CAB
MIS-PFP-110	100x100 mm	40 mm	145 mm	CAB

## Caractéristiques du produit :

Unit	the roll of 1000
Conditioning	By rolls of 1000
Guarantee	1 year
Attachment	Sticker
security	Any
Adhesive	Very powerful
Printing	Thermal / Digital Transfer
Printing resistance	Common use
General resistance	Abrasion
Material	Synthetic
Format	75x40mm
