

# Blank Laserlab 3M Heavy Duty Adhesive Metallic Polyester Machine Plate In Laser A4 Sheets

Total: €161.00

Unit: the box

- Used for all laser printers
- Very resistant
- Manual removal difficult

This high tech machine plate specially designed for laser printers widely exceeds the similar asset plates sold in the market.

This **Machine Plate**, also called as **identification plate** can be printed using any laser printer (including most color printers) and has the same characteristics as that of other [polyester machine plate](#): this type of plate made of metallic polyester and a 3M double thickness adhesive provides an excellent performance on many surfaces (especially rough ones). Manual removal of this **asset plate** is thus difficult.

This machine plate has a high performance **top coat with laser inks**. This asset plate is resistant to **scratches, abrasion, various chemicals, extreme temperatures (-55° to +155°), freezing, humidity, oils, common solvents and cleaning products**.

Moreover, to **create and print** your labels, we offer you the [Nicelabel software](#) and the [Laserlab software](#), compatible with all types of printers.

*Other formats, color pre-printing and transparent protections are available for the machineplate. Contact us. Use the [Laserlab Designer software](#) for laser printing.*

Reference	Format	Number of labels per sheet	Number of sheets per box	Number of labels per box
LSL-PFP-74	75 x 40 mm	12	20	240
LSL-PFP-105	100 x 50 mm	10	20	200
LSL-PSP-109	100 x 90 mm	6	20	120
